ANDREW RAYMOND RAJ A

Front-End Developer

✉ andrewraymondraj@gmail.com 📞 9750667181 ⓞ GitHub in LinkedIn 📍 Chennai

PROFILE SUMMARY

Front-End Developer with expertise in HTML, CSS, JavaScript, Bootstrap, React.js, and SQL. Seeking a position to contribute to high-quality web applications, collaborate with cross-functional teams, and continually enhance skills through challenging projects and professional growth

SKILLS & TOOLS

Skills

HTML(HyperText Markup Language), CSS(Cascading Style Sheets), Bootstrap, Javascript, React Js, SQL, CoreJava , Github

Tools

Visual Studio Code, My SQL Workbench, Eclipse

PROFESSIONAL EXPERIENCE

Besant technologies

Full Stack Developer Intern

04/2024 – present | Chennai

- As a Java Full Stack Developer Intern at Besant Technologies, I developed responsive UIs using HTML, CSS, JavaScript, and React.js and implemented RESTful APIs with Java, Spring Boot, and MySQL. I collaborated with teams, optimized performance, and used Git for version control, enhancing my technical and problem-solving skills.

EDUCATION

B.E Mechaical Engineering

St. Joseph's Institute of Technology(Anna University)

2016 – 2020 | Chennai

Higher Seconday School

CK School of Practical Knowledge,

2016 | Cuddalore

Secondary School Leaving Certificate

Lakshmi Chordia,

2014 | Cuddalore

PROJECTS

Instagram Clone 🔗

HTML | CSS | BOOTSTRAP

- This project recreates Instagram's UI using HTML and CSS, focusing on static, responsive designs for the homepage, profiles, and feeds, replicating Instagram's modern and minimalist aesthetic.

Rock Paper Scissor 🔗

HTML | CSS | JAVASCRIPT

- Create an interactive Rock-Paper-Scissors game using HTML, CSS, and JavaScript, where users play against the computer, which randomly selects rock, paper, or scissors for each round

React Contact Manager 🔗

HTML | CSS | JAVASCRIPT | REACT

- The Contact Manager app allows users to manage contacts by adding, editing, deleting, and searching. It features validation for mobile numbers, an intuitive user interface, and an organized layout for easy navigation and efficient contact management.

Real Time- Customer LoanDetails Analysis 🔗

MySQL

- Developed a Loan Analysis System using MySQL, implementing 6 tables with joins and stored procedures to generate comprehensive reports, simulating real-time scenarios for effective loan management and analysis.

COURSES

Java Full Stack Course

Besant Technologies-Anna Nagar

Chennai

In this course, I learned Java for dynamic applications, HTML for structuring web pages, and CSS for styling with responsive design. I developed skills in JavaScript for interactivity, React.js for component-based UIs, and SQL for database management, including querying, joins, and aggregating data, enabling full-stack web development.
